

R-ISO-CHECK ISOLATION RESISTOR EMULATION

Revision 3

Adjustable 2-channel resistor card for isolation testing in the high voltage area.

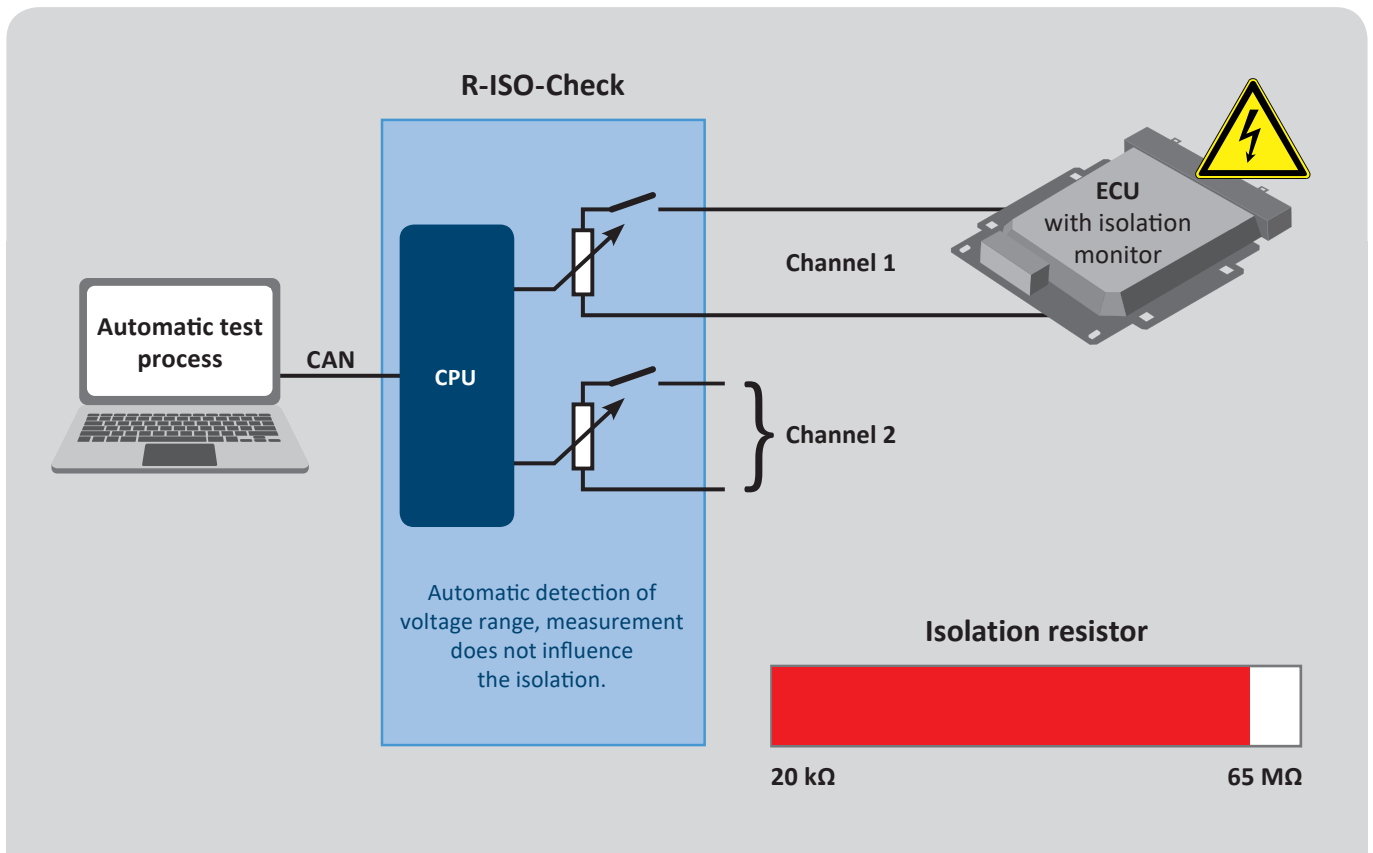

Technical data

Communication:	CAN bus 500kBd / 1MBd
Value range:	20kΩ .. 65MΩ over whole range of 1000V
Accuracy:	+/-1%, 100ppm / °C @ 40kΩ to 16MΩ
Resolution:	1 kOhm
Channels per board:	2 channels

Electrical isolation:	2 kV
Voltage measurement:	► up to 1000V, accuracy +/- 10% ► does not influence electrical isolation
	Bar graph display on front panel
	Self-protection of each channel

Simulation of isolation resistor.

All solutions above are comemso products. Further information about the individual products can be found as a brochure at www.comemso.com or on request at sales@comemso.de.

One hardware, two applications. R-ISO-Check is the perfect complement of the test systems for BMS or EVSE/EV.

BMS test system

EVSE/EV test system
